

## Did Jeffrey Epstein really committed suicide?

By Alphee Lavoie

Can good research prove Astrology or not? I did the research on it.

First let me explain my research. I use the Fast Research Software Program from my software company, Air Software. With this program you can research any astrological techniques. If it moves in the sky you can put it into your research. But here is what the program does that is excellent. You can take your research files and set up all types of astrological criteria and match it against the control group. The research will find all the astrological criterion that is important with your research group. It will create an artificial intelligence model given different numerical weights depending on how high the occurrence, the chi-square and the profitability is. Then you can send any chart through the artificial intelligence model and it will tell you how well that it compares with the group's that were researched. Using control groups in your astrological research is very important. If you don't use control groups your research is almost useless. I used 492 timed charts of people that committed suicide for my research. I let the research program create an artificial intelligence model. When I sent the research group charts through the created model you can see that it pretty well shows that they have all of the same important astrological criteria. See below.

Dunn, Grant	Yes	Don't Know	Yes
Suicide: Hanged 13939	Yes	Don't Know	Yes
Saunders, Scott	Yes	Don't Know	Yes
Anthony, Ernest C. Jr.	Yes	Don't Know	Yes
McDonough, Kevin	Yes	Don't Know	Yes
Sims, Laren	Yes	Don't Know	Yes
Cobain, Kurt	Yes	Don't Know	Yes
Reed, Edward James	Yes	Don't Know	Yes
Pasini, Elisa	Yes	Don't Know	Yes
Suicide: Gunshot 14259	Yes	Don't Know	Yes
Suicide: Hanged 14276	Yes	Don't Know	Yes
Damon, Michael	Yes	Don't Know	Yes
Dunn, Richard	Yes	Don't Know	Yes
Sperandeo, Rita	Yes	Don't Know	Yes
Poirier, Melissa	Yes	Don't Know	Yes

Then I took Jeffrey Epstein's chart and sent it to this model. As you can see it doesn't seem like he committed suicide. You can see the difference in the results from Epstein to other people that had committed suicide. So it appears that somebody did him in.

Let's go a little further to see if astrology research really works. You notice that I have Robin Williams in the graph below. But when I did the full research with 492 suicidal people I didn't include Robin Williams chart. And yet when I send Robin Williams chart through the suicidal model in the graph below that in this lifetime it shows Robin Williams is high, indicating that in this lifetime he could commit suicide.

	Not	Don't Know	Yes
jeffrey epstien	Not	Don't Know	Yes
Robin william	Not	Don't Know	Yes
Suicide: Hanged 44253	Not	Don't Know	Yes
Atria, Rita	Not	Don't Know	Yes
Devens, Sarah	Not	Don't Know	Yes
Suicide: Hanged 14586	Not	Don't Know	Yes
Savorani, Stefano	Not	Don't Know	Yes

Yes, my experience of 60 years as a full-time astrologer I believe that astrological research can give you many correct answers if it is used correctly.
